## SPRING

○ bag urban

○ bag

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.2 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, or by using more intensive farming methods.

Another way to meet this demand is to reduce the amount of food that is wasted. This can be done by improving food storage and distribution systems, or by encouraging people to eat less meat.

There are many other ways to meet this demand, and it is important that we find ways to do so that do not harm the environment or the world's food supply.

One of the most important things we can do is to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

We also need to make sure that we have enough food to eat. This means that we need to make sure that we have enough land for agriculture, and that we have enough water to grow crops.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is increasing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children.

Another reason why the world population is increasing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 60 years. In 1999, the average person in the world lived for 65 years.

There are a number of reasons why the number of people who are surviving to old age has increased. One of the main reasons is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 60 years. In 1999, the average person in the world lived for 65 years.
